

Mpower1 International

Business Development and Investment

Mpower1 is an international operation specializing in business recovery, creation and development. Primary offices in the US and the UK with representation worldwide, Mpower1 is able to call upon an unrivalled combination of experience in management, sales, marketing, development and support to provide a unique business partner for high-tech companies.

Mpower1 invests in chosen businesses and takes a lead and active role in the management, development and expansion of the business.

Mpower1 calls upon a highly experienced team of directors, senior level employees, investment capital and its global infrastructure to deliver an extensive knowledge of

many international markets, the experience to manage the unexpected or unwanted and the necessary network of contacts around the world to achieve, time after time, accelerated growth or recovery of technology companies.

Although Mpower1 has substantial funds in its own right, it also has access to various avenues of venture capital. Mpower1's unique combination of investment, infrastructure, experience and management ensure that an investment of any kind is an investment in a sound future.

Mpower1 in MultiValue

Mpower1 is fast becoming the investment leader in the MultiValue marketplace since first establishing jBASE International in 2002 to invest in and develop upon the operations of the leading MultiValue database and development environment.

In the last seven years, Mpower1 has created a solid worldwide presence adding an additional three companies to its stable of successful global operations and bringing a number of new, innovative MultiValue products to market:

jBASE International: MultiValue Database & Development Tools

BlueFinity International: .NET Tools for MultiValue

SC Systems: Rapid Application Development & Conversion Tools

BAS International: .NET and MultiValue Application Development

Mpower1 is committed to offering MultiValue customers complete solutions by continuing its investment and commitment to both forward thinking products and organizations that enable increased connectivity and flexibility to the MultiValue community. Further, Mpower1 has expanded its operations into the .NET development environment with particular focus on customers that wish to embrace both MultiValue and .NET.

In addition to the successful MultiValue organizations, Mpower1 has also enabled expansion in businesses across industries as diverse as document distribution, haulier support and energy harvesting technology. Mpower1 continues to seek investment opportunities across the globe.

jBASE International offers a suite of database management products and development tools. jBASE, the flagship product, provides a multidimensional database, a development environment including a development language, and a middleware **jEDI** component allowing other mainstream and standards-based products to communicate with the jBASE products. Related products include **jRCS** which enables access to jBASE from Microsoft .NET and ActiveX environments, Java and C++ environment and **DREM** which enables 128-bit encryption and decryption of data at the file system level.

SC Systems offers a full line of Rapid Application Development tools to the MultiValue community. Their **OSMOSIS** software suite is a complete environment for creating and managing comprehensive and user-friendly applications. OSMOSIS provides the tools to transfer applications from older and less functional environments to modern, flexible and user-focused solutions.

BlueFinity International supplies leading-edge software development tools and consultancy services to the MultiValue database and Microsoft developer communities. The flagship product, **mv.NET**, provides a 100% native .NET interface to all MultiValue database platforms, allowing .NET developers to access all aspects of MultiValue systems, data and program code, from within their .NET application. BlueFinity also offers **mv.RSDC** for Microsoft Reporting Services functionality and **mv.SSIS** for SQL data integration and data warehouse developments.

BlueFinity Application Services (BAS) offers access to unequalled expertise in the both **MultiValue and Microsoft technologies**. In addition to specific consulting packages, BAS can meet needs ranging from straightforward programming to comprehensive project management encompassing strategic planning, implementation, and deployment. Whether services are required as a one time project or as part of an outsourced development and support contract, BAS will help you to maximize your technology investment.

OTHER MPOWER1 COMPANIES

Coview is a secure internet based communication gateway direct to your customers desktop. It fully automates, guarantees and controls the transfer and update of documents and digital content to customers, partners and staff. It controls and maintains documents even after they have been published and distributed to your customers and staff, ensuring that only the very latest documents are ever in use. It also alerts them, to updated or new documents as well as highlighting what has changed. The direct communication gateway also provides a unique vehicle for direct-to-the-customer target marketing and sales. Its operations are both simple and cost effective. For your customers it is highly intuitive meaning that there is no training or implementation process necessary.

Pedalite International designs and manufactures products using unique patented energy harvesting technology. The company's best selling products are the unique 360 degree visibility battery-free **Pedalite** lights for cyclists. These are complemented by the unique **Baglite** product that can be fitted to any backpack and the innovative and exceptionally lightweight **Anklelite** product for horse riders.
